

3D STUDIO SERVICES

Partnering with customers to visualize dreams and designs

Designed for SMBs and Enterprises, EFI Optitex 3D Studio Services offers a unique combination of 3D digital solutions to help existing and new customers enjoy the benefits of photo-realistic material creation, scanned avatar solutions, 3D modeling and more. Harness the power of 3D to reduce the number of samples you create and to produce samples with better quality and higher accuracy. This new suite of services is seamlessly integrated into EFI Optitex's CAD solution.

A skilled team of EFI Optitex 3D technical artists and designers work alongside our customers through every stage of the design process, with added-value expertise that includes 3D consulting analysis and solution building services, mentoring, customer training and implementation.

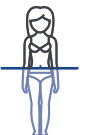

EFI OPTITEX 3D STUDIO SERVICES SUITE INCLUDES:

Fabric Digitizing. Customer fabrics, visually scanned and physically tested in compatible EFI Optitex files

3D Asset Library. Creation of 3D models, such as buttons, clips, stitch types, and more

3D Scanned Avatar Creation. End-to-end Avatar creation solution, from 3D scanning to PDS visualization

3D Consulting Analysis & Solution Building. Comprehensive 3D consultancy services starting from the early adoption of PDS/CDS

Parametric Avatar Creation. Uniquely customized service to parameterize customer size charts into models

Partnering with customers to visualize dreams and designs

EFI Optitex 3D Studio Services helps customers become more efficient and productive by harnessing the power of 3D technology, to improve overall operations and accelerate decision-making. Our services are designed to help your business thrive by bridging the gap between 3D technology and business process improvement, opening up a whole new world of opportunities.

KEY BENEFITS

- Significantly reduce number of samples required, saving costs and valuable resources
- Increase overall sample quality and accuracy
- Stay up to date with the latest technology trends and bypass disconnects, for a real competitive edge
- Enhance 3D scanning capabilities to generate high-quality true-to-life sized models
- Create custom-designed Avatars according to your unique requirements
- Build a 3D digital Asset Library that can be easily shared across your design team
- Create your own Material Library, with both visual and physical attributes
- Profit from a wide range of Consulting Services to enhance internal 3D operations and methodologies

At EFI Optitex, we are continuously striving for excellence. We are committed to understanding each of our customer's unique requirements in order to meet and exceed expectations. We invite you to join the roster of satisfied 3D Studio Services customers, leading global brands, who have taken their business to the next level.
